*This summary is incomplete in that reports from all stations are not included. Only larger stations, or stations representative of a geographical area are included. Fluctuations in strength at some stations, or in some areas may be the result of not having received all of the reports from those stations or areas at the time this summary is published.

**The strength of stations so marked is either increased because of being the base of maneuvers in that area, or is omitted entirely from this summary because the major part of command is absent on maneuvers.

Note 1: Four (4) cases of meningicoccic meningitis were reported from the following-listed stations:

Camp Edwards, Mass. - 1 case Fort Geo. G. Meade, Md. - 3 cases

Note 2: Fourteen (14) cases of trichonosis have been reported from Camp Edwards, Mass.
